
AFRICAN JOURNAL OF AQUATIC SCIENCE

Instructions for authors

Original Papers, Reviews or Short Notes in the field of aquatic sciences, including limnology and hydrobiology, covering all African inland and estuarine waters, will be considered for publication in the Journal. Contributions should be a maximum of 2 500 words for Short Notes and 7 500 words for Research Papers, but Review articles of up to 12 000 words will be considered for publication. Correspondence relating to editorial matters should be e-mailed to the Editor-in-Chief at ajas.ed@gmail.com.

Editorial policy: Contributions are accepted on the understanding that the authors have the authority for publication. Submission of multi-authored manuscripts implies that all authors have approved submission of the article to this Journal, have read it and approved of its publication. Manuscripts should not have been published before and must not be under consideration by another journal. The submission of a manuscript by the authors implies that they automatically agree to assign exclusive copyright to the publishers of the *African Journal of Aquatic Science*, NISC (Pty) Ltd. Contributions must conform to the principles outlined in **Ethical considerations in research publication** available on the Journal's Instructions to Authors page*.

Page charges of R175 (excl. VAT) per page for African contributors and US\$30 per page for contributors from elsewhere are levied. Authors who do not have access to funding to cover the publication costs may apply to the Editor-in-Chief to have their page charges waived. Illustrations can be reproduced in colour, but only when essential, and subject to approval by the Editor-in-Chief. Non-essential use of colour will be charged at R900 (excl. VAT) per page for African contributors and US\$150 per page for contributors from elsewhere.

Manuscript submission: All submissions should be made online at the *African Journal of Aquatic Science* ScholarOne Manuscripts site (<http://mc.manuscriptcentral.com/ajas>). New users should first create an account. Once a user is logged onto the site submissions should be made via the Author Centre. Please read the guide for ScholarOne authors before making a submission. Guidelines for preparing your manuscript to this journal are provided below.

Manuscript format: Manuscripts must be prepared using MS-Word (font Times New Roman, 12 pt) in A4 format, 1.5 line spacing. There should be a single space between sentences. Number all pages sequentially. Refer to the Journal's Instructions to Authors webpage* for a sample manuscript and additional guidelines. Tables combined and figures combined are to be submitted as separate files.

The **title** should be a concise description of the study's key content.

An **abstract** of not more than 200 words, at the beginning of each paper, is required for Articles, Reviews and Short Notes. Please submit a maximum of eight relevant **keywords**, listed alphabetically, that do not appear in the article title.

The **text** (excluding Short Notes) should be divided into sections that typically follow the order: Introduction, Material and Methods, Results, Discussion, Acknowledgements, References. The sections/subsections must not be numbered.

Tables and figures — Each table and figure must be numbered with Arabic numerals and must be accompanied by an appropriate stand-alone caption. Tables and figures must be formatted to fit the page vertically with a printed width of either 84 mm or 176 mm. Tables may include up to five horizontal lines but no vertical lines. Authors must ensure that their figures conform to the style of the journal. Pay particular attention to line thickness, font and figure proportions, taking into account the journals printed page size. Costs of redrawing figures may be charged. Please refer to **Figure Guidelines for Authors** available from the Journal's Instructions to Authors webpage*. For digital photographs or scanned images the resolution should be at least 300 dpi for colour or greyscale artwork and

a minimum of 600 dpi for black line drawings. These can be saved (in order of preference) in PSD, JPEG, PDF or EPS format. Graphs, charts or maps can be saved in AI, PDF or EPS format. MS Office files (Word, Powerpoint, Excel) are also acceptable but DO NOT EMBED Excel graphs or Powerpoint slides in a MS Word document, rather send the original Excel or Powerpoint files. More detailed technical information is given in **Figure Guidelines for Authors**.

References within the text should be quoted chronologically as surname and year within brackets, e.g. (Cox 2005; Day 2009). For references with more than two authors please cite the reference in the text as (Allanson et al. 1999). Where reference is made to more than one work by the same author, identify each citation in the text as (Allanson 1999, 2000a, 2000b). At the end of the manuscript, list the references alphabetically, and then chronologically, in the following style:

Allanson BR, Baird D, Heydorn AE. 1999. Perspectives. In: Allanson BR, Baird D (eds), *Estuaries of South Africa*. Cambridge: Cambridge University Press. pp 321–327.

Paterson AW. 1998. Aspects of the ecology of fishes associated with salt marshes and adjacent habitats in a temperate South African estuary. PhD thesis, Rhodes University, South Africa.

Whitfield AK. 1989. Ichthyoplankton interchange in the mouth region of a southern African estuary. *Marine Ecology Progress Series* 54: 25–33.

Refer to **Reference Exemplars for Authors** available on the Journal's Instructions to Authors webpage* for more examples.

Conventions: Manuscripts must be written in clear English (UK spelling). Consult the Oxford English Dictionary for spelling, capitalisation, hyphenation and abbreviation conventions. **Units of measure** — The SI system of metric units is used, as is the 24-hour clock (10:00, 21:30). If non-standard units are used, these should be defined in the text. No units are associated with salinity. There should be a space between numerical values and their units (e.g. 500 ml, 23 g l⁻¹) except for percentages (25%). Dates should be written as 13 July 2012. Ranges should have an en dash (3–5 km). Conventions on presenting mathematical and statistical data are outlined in **Guidelines for the Presentation of Mathematical and Statistical data** available from the Journal's Instructions to Authors webpage*. The period (.) must be used as the decimal indicator and thousands/millions should be marked with a space and not a comma (e.g. 1 234.56 g). **Species names and authorities** — The International Code of Nomenclature style must be observed for scientific names. Only use brackets for authorship if the genus name has changed, e.g. '*Clarias gariepinus* (Burchell, 1822)'. 'Author and publication date' are not specifically required after scientific names used in the MS's title, but may be used there if an author so wishes. However, they **must** be quoted after the first usage of 'major' species mentioned in both the Abstract and the Text. They are not required for every scientific name listed throughout a manuscript. **Ecotoxicology information** — Field concentrations of metals or organics in water, sediment and biota must be accompanied by certified reference material [CRM] data demonstrating data quality. Experimental exposure concentrations must be validated with measured concentrations; nominal exposure concentrations are not acceptable.

Proofs: The 'corresponding author' will receive proofs for checking. Corrections to the proofs should be restricted to those that have been introduced during the production process. Other than such corrections, substantial alterations may be charged to the author.

Electronic reprints: Authors will be notified by e-mail when their article is available for download from the journal website.

Open access: *African Journal of Aquatic Science* is a hybrid journal which allows authors the option of publishing their article Open Access for a set fee. Further details are given in **Gold Open Access Procedure** available from www.nisc.co.za/openaccess.
