
OSTRICH: JOURNAL OF AFRICAN ORNITHOLOGY

Instructions for Authors

The journal will publish refereed scientific papers, reviews, perspectives and short communications containing the results of original work within the general field of ornithology in Africa and its islands. Reviews of relevant books will also be published. All communications, with the exception of book reviews, will be scrutinised by referees. The journal adheres strictly to a double-blind review process.

Editorial policy: Contributions must conform to the principles outlined in **Ethical Considerations in Research Publication** available from the Journal's Instructions to Authors page*. Submission of a manuscript implies that the material has not been published previously, nor is it being submitted elsewhere for publication. Submission of a manuscript will be taken to imply transfer of copyright of the material to the publishers, NISC. Contributions are accepted on the understanding that the authors have the authority for publication. Material published in this journal may not be reprinted, published in translation or mounted on any electronic repository without the express permission of the publishers, NISC (Pty) Ltd.

Manuscripts: All manuscripts should follow the manuscript format outlined below and will be returned to the authors if not. Manuscripts should be submitted in English in MS Word via the journal's ScholarOne Manuscripts site (<http://mc.manuscriptcentral.com/tost>). New users should first create an account. Once a user is logged onto the site submissions should be made via the Author Centre. Should you have difficulty submitting material online, please notify the Editor-in-Chief, Dr Alan Lee, at alan.tk.lee@googlemail.com. A recent issue of *Ostrich* should be consulted for general layout and style.

Manuscript format: Sections — All pages must be numbered consecutively, including those containing the references, tables and figures. Authors must also insert line numbering. Text should be written in clear English (UK spelling) and divided into the following sections in this order:

- (1) Abstract (not exceeding 300 words)
- (2) Keywords
- (3) Introduction
- (4) Methods
- (5) Results
- (6) Discussion
- (7) Acknowledgements
- (8) References
- (9) Tables
- (10) Appendices
- (11) Figure legends

Short communications should include an Abstract and Keywords, but no other subheadings in the body text.

Figures — Ensure figures conform to the journal style. Pay particular attention to line thickness, font and figure proportions, taking into account the journals printed page size. Costs of redrawing figures may be charged. Please refer to **Figure Guidelines for Authors: Format, Style and Technical Considerations** available from the Journal's Instructions to Authors webpage*. For digital photographs or scanned images the resolution should be at least 300 dpi for colour or greyscale artwork and a minimum of 600 dpi for black line drawings. Images can be saved (in order of preference) as PSD, TIFF, EPS, PDF or JPEG files. Graphs, charts or maps should be exported as AI, WMF, EMF, EPS, PDF or SVG files. MS Powerpoint and Excel files are acceptable. **Do not embed images in the Word document, rather use 'Insert Picture from File'**. More detailed technical information is given in **Figure Guidelines for Authors***. Illustrations can be reproduced in colour, but only when essential, and subject to approval by the Editor-in-Chief. Non-essential use of colour will be charged at ZAR900 (excl. VAT) per page for African contributors and USD75 per page for contributors from elsewhere.

Tables — Each table, numbered with Arabic numerals in the order in which they are to appear, must be on a separate page with the table number and an appropriate stand-alone caption. Tables may include up to five horizontal lines but no vertical lines.

References — References to literature within an article must be arranged chronologically in the following forms: Swart (1972); Swart (1972a, 1972b); Swart and White (1973); Swart (1972, 1973); (Swart 1970, Smith 1971). For more than two authors, use the first author's name followed by et al. (e.g. Urban et al. 1997). At the end of the manuscript list references alphabetically and then chronologically, using full journal titles, and adhere to the following formats (for additional examples refer to **Reference Exemplars for Authors** available from the Journal's Instructions to Authors webpage*):

Payne RB, Payne LL. 1997. Field observations, experimental design, and the time and place of learning in bird songs. In: Snowdon C, Hausberger M (eds), *Social influences on vocal development*. Cambridge: Cambridge University Press. pp 57–84.

Urban EK, Fry CH, Keith S (eds). 1997. *The birds of Africa*, vol. 5. London: Academic Press.

Vergara P, Aguirre JI, Fernández-Cruz M. 2007. Arrival date, age and breeding success in White Stork *Ciconia ciconia*. *Journal of Avian Biology* 38: 573–579.

Roberts Birds of Southern Africa (and other such edited regional works): Please note that when referencing a single species account, the author of that account should be cited, for example:

du Plessis MA. 2005. Green Woodhoopoe. In: Hockey PAR, Dean WRJ, Ryan PG (eds), *Roberts birds of southern Africa*. 7th Edn. Cape Town: Trustees of the John Voelcker Bird Book Fund. pp 162–164.

However, when referencing multiple accounts (e.g. extracting clutch-size data) the entire volume should be cited:

Hockey PAR, Dean WRJ, Ryan PG (eds). 2005. *Roberts birds of southern Africa* (7th edn). Cape Town, South Africa: Trustees of the John Voelcker Bird Book Fund.

Conventions: The English name of a species is capitalised (e.g. Southern Brown-throated Weaver) but not the name of a group of species (e.g. robins, weavers). Scientific names of genera and species – but not family names – and foreign words should be italicised. Trinomials may be used only when accurately known and essential to the results and discussion. Both the English and scientific names must be cited when a species is first mentioned but thereafter only one need be used. The English and scientific names of a species should follow the IOC world bird list (<https://www.worldbirdnames.org>). For southern African birds, please mention alternative names should these differ from those of the IOC according to official BirdLife South Africa checklists (<https://www.birdlife.org.za/media-and-resources/bird-checklists/>); for example, Hadada (Hadeda) Ibis *Bostrychia hagedash*. Metric symbols and their international symbols are used throughout as is the decimal point and the 24-hour clock (e.g. 08:00, 17:25). Dates should be written as 13 July 1973. Ranges should have an en dash (3–5 km). There should be a space before unit terms (23 °C, 5 kg, 5 kg d⁻¹ etc.) except for percentages (5%). Use 'mass' instead of 'weight'. The UK spelling convention should be followed. There should be a single space between sentences. The period (.) must be used as the decimal indicator, and thousands/millions should be marked with a space and not a comma (e.g. 1 234.56 g). The significance of statistical tests should be written in the form $p < 0.001$, and use ns for not significant. For stylistic conventions, refer to **Presentation of Mathematical and Statistical Data** available from the Journal's Instructions to Authors webpage*.

Electronic reprints: Authors will be notified by email when their article is available for download from the Taylor & Francis website (www.tandfonline.com).

Open access: *Ostrich* is a hybrid journal which allows authors the option of publishing their article Open Access for a set fee. Further details are given in **Gold Open Access Procedure** available from <http://www.nisc.co.za/openaccess>.
